A woman's breasts signify femininity, beauty and youthful vitality. For some, however, a lack of volume or shape can be a concern. For others, pregnancy, weight fluctuations or ageing has changed their breasts, which can affect confidence and self-image. Dr Michael Miroshnik is a leading plastic surgeon who specialises in natural-looking breast augmentation. He uses advanced techniques, combined with his artistic flair to produce beautiful results which continue to make him so highly sought after by Australian women.
